Table 8. Estimated numbers of cases and rates (per 100,000 population) of HIV/AIDS, by race/ethnicity, age category, and sex, 2001–2004—33 states with confidential name-based HIV infection reporting (*cont*)

Age category	Year of diagnosis							
	2001		2002		2003		2004	
	No.	Rate	No.	Rate	No.	Rate	No.	Rate
American Indian/Alaska Native								
Adult or adolescent								
Male	127	18.9	134	19.5	130	18.6	148	20.8
Female	44	6.2	66	9.2	56	7.7	57	7.7
Subtotal	171	12.4	199	14.2	187	13.0	205	14.1
Child (<13 yrs)	0	0	3	0.7	0	0	1	0.3
Total	171	9.5	202	11.1	187	10.1	206	11.1
Total cases^a	41,207	22.8	39,222	21.5	38,139	20.7	38,685	20.7

Note. These numbers do not represent reported case counts. Rather, these numbers are point estimates, which result from adjustments of reported case counts. The reported case counts are adjusted for reporting delays and for redistribution of cases in persons initially reported without an identified risk factor. The estimates do not include adjustment for incomplete reporting.

Data include persons with a diagnosis of HIV infection, a diagnosis of HIV infection and a later diagnosis of AIDS, or concurrent diagnoses of HIV infection and AIDS.

Since 2000, the following 33 states have had laws or regulations requiring confidential name-based HIV infection reporting: Alabama, Alaska, Arizona, Arkansas, Colorado, Florida, Idaho, Indiana, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, and Wyoming. Since July 1997, Florida has had confidential name-based HIV infection reporting for new diagnoses only.

^a Includes persons of unknown race or multiple races and persons of unknown sex. Because column totals were calculated independently of the values for the subpopulations, the values in each column may not sum to the column total.
